## WORK EXPERIENCE

### Senior Software Engineer, Layer

January 2020 - present; Remote

Building GitHub for Spreadsheets at an early stage startup. As part of product engineering team executed efforts to shape ideas, implement them and ship to customers. While constantly embracing "you build it, you run it" attitude, contributing to the whole stack, with biggest focus on backend development.

### Senior Software Engineer, ValueLogic

February 2016 - December 2019; Wroclaw, Poland

Product development, maintenance, operations and team lead responsibilities for Immobilienscout24 - Germany's leading digital real estate marketplace.

Technical team lead/backend development/devops for bookado.io - product designed to simplify meeting room reservation activities within organisations.

Fullstack development for Retarus - global company focusing on improving business processes by delivering automation of key communication channels, such as email, fax, sms.

### Senior Software Engineer, OakFusion

February 2014 - January 2016; Wroclaw, Poland

Product development, maintenance and operations responsibilities for Immobilienscout24, Germany's leading digital real estate marketplace.

### Senior Software Engineer, Avaleo

October 2012 - February 2014; Wroclaw, Poland

Product development responsibilities for Danish company, which delivers adaptive case management solutions to public as well as private providers of welfare services.

### Senior Software Engineer, Nokia Siemens Networks

June 2010 - August 2012; Berlin, Germany; Wroclaw, Poland; San Francisco, USA

Productization of Telco Asset Marketplace — a cloud-based service that allows CSPs to safely open up their northbound network interfaces to developers, using best-practice security mechanisms and controls.

### Software Development Engineer, Nokia Siemens Networks

March 2010 - May 2010, San Francisco, USA

Startups@NSN internal incubator initiative to prototype solutions and explore new market opportunities focused on telecom cloud services.  
Working in international team on Telco Asset Marketplace project.

### Software Development Engineer, Nokia Siemens Networks

February 2009 - February 2010, Wroclaw, Poland

Taking part in knowledge transfer of Charge@Once Mediate (mediation engine for telecoms) from Finland to Wroclaw R&D department and further development.
